Absent:

Theme: Supporting the school and wider community

School Council Agenda

Planning for our visit to City Hall

The School Council met on 23/2/24 to briefly discuss our planned visit for City Hall. We shared ideas about the school and Local environment including asking questions related to rubbish collections, sustainability and air quality.

Since Keir Hardie received a bronze award for Healthy School's we wanted to ask what the council were planning on doing to make going to school safer and challenge smokers and vapers who may be near the school.

Our visit to City Hall

Councillors and prefects went to City Hall and learned about the history behind London. They discussed future topics and what matters to the children of Newham. Children discussed issues such as smoking and air quality and found out that not only are disposable vapes being banned but that the government plans to ban smoking so younger people will never be able to smoke which will help air quality and promote good health!

The councillors and prefects sat in on a London Assembly meeting and got a special shout out by the lead speaker!

We left feeling very motivated and inspired to improve our school community.

Agreed Actions/ Next Steps

School councillors Prefects will meet 22/3/24 to discuss next steps to explore rights respecting school award.
